Institut d'Enseignement Supérieur de Ruhengeri (INES-Ruhengeri)
Course: Artificial Intelligence, SWE 3513 · Individual Assignment 2: Musanze Harvest Intelligence Service

Student name	Dominic Onen
Registration number	25/28259
Institutional username	ug2528259@ines.ac.rw
Verification code	AI-A2-8259
Repository	https://github.com/DominicOnen/AI_A2_2528259

Statement

I, Dominic Onen, registration number 25/28259, declare that:

1. I have read the assignment brief and the INES academic integrity rules, and this submission is made by me.
2. The random seed (8259), the dataset, the fingerprint, the metrics and the plots come from my own registration digits and from running the submitted code myself.
3. I used an AI assistant (Claude, by Anthropic) to help generate source code, tests and documents. The details are in *evidence/AI_USE.md*.
4. I ran the pipeline, the tests and the API on my own computer, and I recorded the demonstration video myself.
5. I understand how the system works. I can explain the model choices, one error and one cluster, and I can change my code when asked.
6. The dataset is synthetic. No real personal or farm records, passwords, tokens or private keys are included.
